And now for 4065, "Speak Your Future."

Nathaniel Bronner: Amen, amen, amen. This has been a glorious Christmas season, it really has. It's been the warmest and the wettest Christmas that anyone can ever remember. And I do believe there is a reason for that. It even is going to tie in with the first message of the New Year. There are no accidents and we are so blessed. Be it hot or cold, wet or dry, we are blessed. And this is indeed been a glorious season, it really has. I feel super. I know some of you say, "Pastor, you feel super everything." Yes, I do. Yes, I do. So, you have rarely ever heard me even with my incident when I was in the worst shape of my life. I was still in good shape and a lot of this stuff is mentality because you are as you speak you are. And your body will hear, your spirit will hear what you say. And that's why God says, "My name is, I am, I am, as I am." And if you go "I am feeling bad today." Yes, you are. "You know, I'm not looking too hot today." No, you're not. So, whatever you say you are, the thing has a power to manifest in your spirit, in the very cells of your body. So, I am feeling super! I just am, I really am. It is just --

And I want stay that way and I want to be able to make that same declaration when I'm a hundred years old. And it does not come by accident, it comes by choice. And you have a choice to declare it and you also have a choice to do the things that make it so. Because a lot of this stuff, it just doesn't come by naming and claiming it. You got to do the stuff that makes it so. Now, I do believe that there is a level of faith for you can literally will anything in the world into existence. I do believe that, but to be honest, I don't have that level of faith. I believe that you can walk on water. I know how to swim because my level of faith is not there where I can walk on water but I believe it's possible. I just can't do it yet, but I'm working on it.

But until I can walk on water, I don't even know how to swim, so I believe that life has so much in store for us. And as we grow and change and understand some things, stuff will get better, and better, and better, and better. I believe that the best part of my life is in front of me. And today, I'm as young as I'm ever going to be. Do you know that? Do you realize that today, you are as young as you are going to be? So, you need to rejoice in this and in that fact and understand some things. Life is just good! Life is good! Oh, life is good.

Albert Einstein, who is perhaps credited as being one of the greatest scientific geniuses of all history. Albert Einstein had this statement. He says, "The greatest decision that you will make in life." And he was a religious man. He said, "The greatest decision that you will make in life." He understood a whole lot about quantum physics and about all of the things of the physical world. He said, "The greatest decision that you will make in life is deciding whether the universe is friendly or hostile towards you." And it doesn't depend on your belief in God because you can believe God is hostile towards you. Why did God just caused all this stuff to happen to me? You can believe even God himself is hostile towards you.

00:05:01

Einstein says, "The greatest decision you'll make in life is whether the universe is friendly or hostile towards you." The universe loves me. Because the one who made the universe loves me. So, if the one who made the universe loves me, even when some things that others would consider bad happens. It's all for my good because He loves me. The one who made the universe, who shaped and breathed all into existence, it really -- Sometimes, we say in the blink of an eye but modern science is now gotten to the point -- they've gotten the way from the Big Bang theory and they've gone to basically the instantaneous creation of the universe. And they say it all came to be, in a trillionth of a second. They went from, they couldn't believe God created the earth in seven days so the whole universe is now done in a trillionth of a second. A trillionth of a second, do you know a trillionth of a second is no comparison to a blink of an eye? A blink of an eye takes about a third of a second. A trillionth of a second is beyond human comprehension. God created the universe according to science. This is the modern quantum physics theory, faster than we

can think. You can't even say, "Boo" in a trillionth of a second. Boo takes about a half a second. So, God created the earth and the whole universe, five hundred million times faster than you can say "boo." Thank God loves me. So, when I recognize and understand it, that God loves me, how can anything bad happen to me? So, when you understand that it changes your view of everything in the universe, because my daddy loves me. It's not just a friendly universe, it's a loving universe. And love is a whole different level than friend. I feel super. I don't just feel good. I feel super from the top of my gray head to the bottom of my rusty feet. Well, they're not rusty because I put some oil on the good foot. Oh yeah, to the bottom of my feet, I feel super! So, people, I just hope that a little bit of this can flow down on you. I just hope a little bit of this can flow down you. I'm just happy with everything I got. I just am. I'm just pleased with it because it's you and you can't change you. It's you!

So, if you're not happy with your -- No, you messed up. Oh, I like this no, I just do. I still got some scars and some discoloration right here; all of these are beauty marks. Oh, these are beauty marks. Oh, my goodness, every time I rub it, I'm thankful for the Lord this could have been a whole lot worth. Thank you, every part, of me, I'm just happy with. And this stuff is a mentality people. It's a mentality, it's not what it is, it's what you think it is. And your world becomes your reality based on your mindset. And the Kingdom of Heaven, the Kingdom of God, it is within. It just is. If I see my little lump of sugar sitting down there, (00:08:42) she's so pretty, (00:08:44) My goodness. So, I'm just telling. I'm just telling you, I mean, she's saw about me so well for Christmas. You know there was once a movie and the fellow was talking, and every time he was thinking about something good in the past, his eye would go to twitching. So, I'm telling, life is good even though there are some things in my life and in your life that could use some improving. And let me give you a newsflash, that is always going to be. That is always going to be. There's always going to be some stuff that you're going to want different, that you're going to want better, that you're going to want to change, always. I don't care who you are, I don't care what you have, I don't care where you're going. There's always going to be some stuff that's going to need improving. The key to your life and the key to your joy, and the key to your happiness is whether you can appreciate and enjoy and be

thankful for the things you have right now. Merry, merry, merry Christmas. Because it is a beautiful and it is a Merry Christmas. God bless you. Amen.
